

VEHICLE

Compact Safe

Smallest safe for EMS units, ambulances and compact spaces

Built for First Responders

When seconds count and compliance matters, the Vehicle Compact Safe delivers. Engineered specifically for the demanding environment of emergency response vehicles, this ultra-compact safe combines military-grade security with intelligent inventory tracking.

Real-Time Fleet Visibility

See the status of every safe across your fleet in real time—access activity, system health, and compliance, all in one place.

Automated Inventory Tracking

Inventory is captured automatically on every access. Close the door, and the system records what was removed and by whom.

DEA Compliant

Controlled access and detailed audit logs help support DEA compliance—without manual logs or added administrative work.

Works Offline

Fully functional without network connectivity. All activity is securely logged and automatically synced when back online.

TECHNICAL SPECIFICATIONS

PHYSICAL

External Dimensions	8" W x 7" H x 10" D
Internal Dimensions	5.5" W x 6.5" H x 10" D
Weight	18lbs
Material	10 gauge steel
Finish	Powder-coated steel
